

# IMPRIMO® resins

## Our advantages for you!

### Greater stability

IMPRIMO® resins offer high particle stability, resulting in less effort in daily handling (less stirring required).

### Odorless

IMPRIMO® resins have a pleasant, neutral odor.

### Better adhesion properties

Significantly better adhesion to the build-plate in the first layers leads to more reliable print jobs.

### Higher viscosity

For easier handling, better material properties and less soiling of the devices.

### High-quality ingredients

Our resins contain high-quality ingredients (see safety- and technical data sheet).

### Lower toxicity

This results in various benefits for occupational safety - less toxic monomers.

### Accuracy

Highest possible performance in terms of reproducible and absolute geometric accuracy, resulting in unsurpassed precision.

### Dimensional stability

Even hollow models retain their dimensional stability after printing, which means that they do not warp or age as quickly.

### Made in Germany

Trustworthy quality standards and reliable production for maximum safety.
